Thibault Castelli

Full-Stack Web Developer

Available now

Objective

Highly motivated junior **Full-Stack Web Developer** with **two years of professional experience**. Seeking a challenging role within a collaborative team where I can leverage my skills to build innovative **web applications** from **back-end** to **front-end**.

Work experience

Full stack web developer

2025/01 - Present

Logix Opérations, Canada

- Collaborate on multiple full-stack **.Net Core** and **React** web applications, contributing to both back-end and front-end development.
- Incorporate **SOLID principles** into development practices to ensure high quality code and adherence to software design best practices.
- Apply **Test-Driven Development (TDD)** and **Domain-Driven Design (DDD)** methodologies to improve code robustness and ensure good application architecture practices are followed.

Full stack web developer

2024/06 - 2025/01

Ministry of the Executive Council of Quebec, Canada

- Developed and demonstrated **end-to-end testing** solutions using **TestCafe** and **Playwright**, validating their effectiveness in a proof-of-concept environment.
- Designed and implemented **Azure pipelines** and **Docker** containers to seamlessly incorporate end-to-end testing into the continuous integration and deployment workflow.
- Converted a legacy Classic ASP website into a robust **MVC .Net Core** platform, improving user experience and code structure.

Sound engineer (live/recording)

2017/06 - 2024/06

Freelance, France

- Used industry-standard software and plugins such as **Pro Tools**, **Ableton** and **Izotope** for recording, mixing, and mastering music.
- Demonstrated strong **stress management** skills during live performances while consistently meeting tight project deadlines.
- Collaborated with **cross-functional teams** to achieve common goals and deliver successful recording projects, following artistic direction.

Personality

Adaptability

I embrace change and value constructive criticism as a means to continuously enhance my skills and performance.

Team work

I thrive in multidisciplinary teams, learning from the expertise of my colleagues. I am an attentive listener and willing to contribute to ideas and projects.

Spirit of synthesis

I strive to develop simple and intuitive solutions that address complex problems.
